

DuraBlack®

The only laser markable metal certified for outdoor usage that does not require a chemical pre-treatment or protective topcoat.

DuraBlack® is CO2 laser markable aluminum for durable, on-demand marking for harsh operating environments. In side-by-side tests, DuraBlack® outperforms black anodized aluminum and laser markable acrylic tape in select applications.

DuraBlack®...

- is resistant to sunlight (UV-radiation), abrasion, high-temperatures and chemical exposure
- meets several government, industrial and military specifications
- can be attached to either curved or flat surfaces with adhesive, rivets or screws
- is imaged with any CO2 marking laser to produce a durable, high-resolution barcode or human-readable image
- is available in size 508x305 mm and in thickness 0,51 mm and 1 mm
